# OUR BIGGEST YEAR YET!

**1 million subscribers! 6 Fully Charged LIVE exhibitions globally!**  
**Our 1st Fully Charged AWARDS! To the outside observer**  
**Fully Charged continues to go from strength to strength, but nothing is that simple.**

Our team are just ordinary people, and we too have experienced the cost of living surge since last September. The cost of energy of course has been central to that. In turn, while the clean energy and electric vehicles markets continue to grow globally and in the UK, for many of the organisations we work with, it has also been a time of continued uncertainty which we have also felt emotionally and financially. This was the year after all that saw countless other start-ups struggle – Arrival and Britishvolt being obvious examples – and as start-up ourselves, we thank all of those that attend **Fully Charged LIVE**. Without all of your positive energy, the shift to cleaner, greener technologies would be at risk, and as such it is imperative that we all support each other as much as possible. We believe in a better, electrified world, but it will not be without struggle.

There are many reasons why these events are so unique, but chief amongst them all is the man that started it all – Robert Llewellyn – I can think of few people in the world (that don't own Twitter) that have had such a profound effect on the uptake of clean energy and electric vehicles.

We've always worked to build the **Fully Charged LIVE** shows in his image – inspiring, fun and educational – and that's why the central attraction at all of our events are the 'live sessions' within the Giga Theatre and the Mega Theatre. In addition to Robert, your hosts this year will be the super-talented presenters of the **Fully Charged SHOW** – Jack Scarlett, Elliot Richards, Helen Czerski, Ricky Roy, Imogen Bhogal, Andy Torbet, Emilie Romain and occasionally yours truly.

Above and beyond the theatres, we have an array of attractions for your enjoyment, including:

- **Giga Theatre**, sponsored by Nissan
- **Mega Theatre**, sponsored by UKR&I
- **Watt Drive?** sponsored by Zapmap
- **Electric Launchpad**, sponsored by Everything Electric LONDON
- **Electric & Eclectic**, curated by Fellten
- **Electric Alley**, sponsored by EV Experts
- **Fully Charged BUSINESS**, powered by DriveElectric
- **Commercial Vehicle Zone**, sponsored by Geotab
- **Home Energy Advice Team**, powered by OVO Energy
- **Zero Carbon Kitchen**
- **2 Wheel Test Track**, sponsored by Electroheads
- **Kids Zone**, sponsored by My Green Pod

- **Climate Change Zone**, sponsored by National Grid
- **Watt Drive**, sponsored by Zap Map
- **Electric Picnic**, sponsored by LV=
- **Commercial Vehicle Zone**, sponsored by Geotab
- **Electric Café**, sponsored by Shell Recharge

So far, so good! We're also proud to be able to say that we have 'almost every EV available' on display throughout the show and on our Electric Alley and Electric Launchpad attractions too. What's more there is a fantastic test drive programme on offer as well. However, we have to be honest with you, getting car companies to participate in the current climate is extraordinarily difficult. While there are genuine mitigating factors – not least, the economic conditions in the UK, and vehicle availability issues – we are frustrated that not every manufacturer is present. We believe it's important that you know that we did absolutely everything in our power to get them to attend, including offered the opportunity to display cars at no cost to our Electric Alley attraction. So for transparency we have listed those companies that declined to participate on any level within the exhibitor list.

It is our hope that year on year, when companies see the quantity and quality of our audience, they quickly realise that they need to participate, because as you will see there is no shortage of emerging, progressive companies that are willing to benefit from their absence. So for those progressive organisations that have supported us, we recommend rewarding them with your custom. Furthermore we would like to offer our formal and sincere thanks to all of our sponsors, and especially to our headliners ElectriX, powered by LV= General Insurance, for making this, the 5th edition, of **Fully Charged LIVE UK** possible.

Thanks for your support and enjoy the show!!

**Dan Caesar** | CEO | Fully Charged

## IMPORTANT INFORMATION

**Opening Times** – The show opens at 09:30am on Friday, Saturday and Sunday. We would ask for your patience as you enter the show; queues are quite likely. The show closes at 5:00pm on all three days.

**How To Get Here** – **Fully Charged LIVE** takes place at Farnborough International, final parking information will be sent via email – please ensure you check information sent before you leave.

**Disabled Access** – Electric mobility scooters can be provided from the ticket registration area, and we have tried within the constraints of the venue to minimise the impact of cabling ramps in the outdoor areas of the show.

**Test Drives & Rides** – Whether it is electric cars, or other electric vehicles, access to test drives in a supply constrained market is competitive. If you are unable to access the electric vehicles, our exhibitors will help facilitate opportunities after the event.

**Farnborough presenting team:** Robert Llewellyn, Helen Czerski, Jack Scarlett, Imogen Bhogal, Elliot Richards, Ricky Roy, Emilie Romain, Andy Torbet & Dan Caesar.

# Smart products. For a greener future.

Part of the Easby Group, Easby Energy Solutions is focused on providing the UK & Ireland with premium-quality Energy Storage Systems. We offer a diverse product range, suitable for a variety of sectors at competitive prices. Our range includes:

## SOLAR PANELS

Premium-quality solar panel modules. Available in Glass-glass and Glass-foil options.

## HYBRID INVERTERS

Single Phase Hybrid Inverters 3 to 6 kW & 3-Phase Hybrid Inverters 8 to 12 kW

## BATTERY STORAGE

Available in 5kW, 7kW, 10kW & beyond we can offer a solution to meet your requirements.

## Meet the ivie EV Charger and the ivie Charge app

The route to smarter, simpler, greener home EV charging

**The ivie EV Charger has everything you need to make your home EV charging simple, smart and seamless.**

This Wi-Fi enabled 7.4kW untethered charger works with the ivie Charge app for smart charging that works around your schedule. Add your home energy tariff details to charge your EV when it's cheapest or greenest. Create personalised charging routines, or use the Boost function for instant charging.

**A smart charger. A smarter app. Complete convenience and control.**

- 7.4kW untethered home EV charger
- Wi-Fi enabled to connect with the ivie Charge app
- Schedule charging that suits you and your needs
- Charge when it's cheapest or greenest
- Use Boost for instant charging
- 5-year warranty and surge protection as standard

**Fully Charged Live offer!**

**Order an ivie EV Charger today and save £100!  
PLUS get a FREE charging cable worth £179.99**

### EV Fleet

Let ivie manage your EV Fleet - tailored, fully managed service.

### ivie Bud

## LEBANESE LAMB FLATBREADS WITH SPICED YOGHURT AND MINT

Serves 2

### INGREDIENTS

#### For the flatbreads

140g bread flour  
1 tsp instant yeast  
1 tsp baking powder  
1 tsp dried mixed herbs  
80ml warm water  
1 tbsp olive oil  
1 tsp sugar  
1 tsp table salt  
Vegan butter (for brushing)

#### For the lamb

1 onion  
2 garlic cloves  
1 tsp cumin  
½ tsp coriander  
½ tsp nutmeg  
1 tsp paprika  
1 tsp chilli powder  
300g tempeh  
2 tbsp mint jelly  
1 lemon  
Salt

#### For the yoghurt

150g vegan yoghurt  
1 tbsp mint jelly  
A few fresh mint leaves  
1 lemon  
Pinch of salt

#### For the topping

Handful of mint leaves  
Pinch of chilli flakes

### Before you start

1 large mixing bowl | Small mixing bowl | 2 flat pans | Large saucepan | Pastry brush.

### METHOD

**Start the flatbread** | In a large bowl, mix together the dry ingredients (flour, yeast, sugar, baking powder, mixed herbs and salt) until there are no lumps | Pour in the warm water and olive oil and bring the mixture together to form a large dough ball (ensuring to get every part of the mixture) | Place the dough ball on a lightly floured surface and knead for 6-10 minutes until the ball bounces back when pressed | Place the ball back in the bowl, cover and leave somewhere warm for at least 30 minutes.

**Make the lamb topping** | Crumble the tempeh into small pieces using your hands | Peel and dice the onions and garlic | Place a large pan over a medium heat and add a splash of olive oil | Once warm, add the diced onion, garlic and a pinch of salt | Mix well and cook until the onion begins to turn soft (around 5-10 minutes) | At this point, add the spices and crumbled tempeh | Mix well and cook for 5 minutes before stirring through the mint jelly and lemon juice | Reduce the heat to low and leave to cook for 10 minutes.

**Make the yoghurt** | Finely slice the mint leaves | Place the yoghurt into a small bowl and mix through the mint jelly, chopped mint leaves, a squeeze of lemon juice and a pinch of salt

**Cook the flatbread** | Place 2 large flat pans over a medium heat (on separate hobs) | Take the flatbread mixture from the bowl and cut into 2 pieces | Place each piece on a lightly floured work surface and push down using your hands or a rolling pin to create a round, flatbread shape - it should be quite thin as it will become thicker in the pan | Once the pans are hot, add the flatbreads and cook for 2-3 minutes on each side until golden all over and cooked through.

**Assemble the flatbreads** | Place the flatbreads on 2 serving plates and brush with some vegan butter | Spoon the lamb mixture on top of the flatbreads before drizzling over some mint yoghurt.

**Time to serve** | Chop some extra mint and sprinkle over the top of the flatbreads, along with a pinch of black pepper and chilli flakes (or your favourite toppings).
